

Innovative Textile Products Engineered for Success & Customer Satisfaction

FELLEAB®

With more than 50 years of experience and three manufacturing facilities in North America, FELLFAB® is an industry leader in the design and manufacture of specialized textile products to many critical and demanding markets.

Stability and strength

We believe strongly that a fundamental FELLFAB® strength is our ability to listen to our customers, hear them – and then deliver custom solutions that meet their needs.

We have demonstrated our value added proposition during a long history of continuous innovation and expanding product offerings. Our customers benefit from all we have learned over the years.

We are more than a manufacturer of specialized textile products. We are an engineering company dedicated to working with our customers. We believe in establishing long-term relationships based on providing purpose-built solutions.

Our technological capabilities and wealth of experience have made us a leader in many demanding markets, including industrial, aerospace, aviation, military, materials handling and transportation.

Our vision

Our vision is based on delivering innovation, engineering and entrepreneurial spirit.

Innovation: We believe in breaking new ground to develop cost-effective products for our customers around the world.

Engineering: We are a technology driven company with a strong commitment to quality, manufacturing excellence and production efficiency.

Entrepreneurial spirit: We go the extra mile to better understand our customers and the challenges they face, enabling us to develop solutions to meet their needs.

Our capabilities

FELLFAB® employs a wide range of specialized equipment to meet demanding customer requirements. These include state-of-the-art CAD/CAM technology, and computerized cutting equipment that ensure the highest degree of accuracy within extremely tight tolerances.

FELLFAB® has full EDI capability that facilitates pattern transfer between our manufacturing facilities and our customers similarly equipped. Bar coding of raw materials and finished product allows for efficient inventory management.

In addition, we have received a number of achievement awards and hold many patents and Registered Industrial Designs.

Our quality

Providing high quality products and services to our customers is the Number 1 priority at FELLFAB®. As an ISO 9001:2000 certified organization, we have quality management systems in place to ensure that we are capable of consistently meeting rigid performance criteria that meet or exceed customer expectations, on time and on budget.

Our people

FELLFAB® employees share a strong commitment to excellence and take pride in providing customers the value that they expect.

Our engineers, designers and sales executives are experts in developing long-term and accountable partnerships based on competitive pricing, high performance solutions and product quality second to none.

The FELLFAB® development and engineering team can take a project from conception to completion, working with customers every step of the way to ensure the form, fit and function of the final product.

FELLFAB®

AVIATION

Innovative Textile Products Engineered for Success & Customer Satisfaction

FELLFAB® has become the leading supplier of aircraft interiors to the world's largest air carriers based on more than 40 years experience in the field.

We work directly with airlines, aircraft manufacturers, and OEMs to manufacture products that go the distance. Our products range from fabric and leather seat covers, cushions, curtains and carpet kits to ground support equipment.

Delivering value

But we are more than a product supplier. Through continuous innovation and expanding product offerings, we have demonstrated our value added proposition to our customers, who benefit from all we have learned over the years.

As an engineering company, we are dedicated to establishing long-term relationships based on providing purpose-built solutions, working with customers every step of the way to ensure the form, fit and function of the final product.

Correspondingly, our services include AOG support, certification and testing, and continuous inventory management that can produce significant cost savings.

A commitment to excellence

FELLFAB® employees share a strong commitment to excellence and take pride in providing customers the value that they expect.

Our engineers, designers and sales executives are experts in developing long-term and accountable partnerships based on competitive pricing, high performance solutions and product quality second to none. They specialize in product design and first article development, working in tandem with the customer from project conception to completion.

Our ISO 9001:2000 certification attests to our ability to meet high quality and rigid performance criteria consistently, on time and on budget.

And thanks to state-of-the-art capabilities such as computerized cutting, our manufacturing facilities in the U.S. and Canada are equally capable of efficiently serving the total North American market.

We have the ability to manufacture to FAA approved specifications. Additionally, our facilities in College Park, Georgia, and Fort Worth, Texas, also have CFR14 Part 145 Repair Station Certification.

"FELLFAB® was the first manufacturer in our industry to install computerized cutting systems.

It means all our plants across North America can provide the same outstanding high quality and uniformity.

Our success in building long-term relationships based on our skills and commitment has made us the largest North American manufacturer of aircraft interiors."

FELLFAB®

TRANSPORTATION

Innovative Textile Products Engineered for Success & Customer Satisfaction

Today's global transportation industry is continuously modernizing as it journeys towards an exciting future. FELLFAB® is travelling right along with it.

We have been a leading supplier to the passenger rail and transportation industry designing and fabricating seating and interiors for more than 40 years.

A value-added partnership

We offer the widest range of products in North America to meet industry requirements, including seat cushions, covers, curtains and carpets.

We offer quality replacement and refurbishment product solutions. In addition, our value-added services include full design capability which allows us to work directly with seat designers and OEMs in developing full seat assemblies.

But we aren't resting on our laurels.

A commitment to innovation

Our innovative designers and engineers go the extra mile to better understand our customers and the challenges they face. They are constantly developing new and cost-effective products, driven by a strong commitment to quality, manufacturing excellence and production efficiency.

We can quote to drawing or design to meet any requirement. Our skills are backed by long-term project and inventory management capability and the ability to manage large programs.

Our ISO 9001:2000 certification demonstrates our capability to meet the most rigorous performance criteria consistently and cost effectively.

At FELLFAB®, a member of the American Public Transportation Association, we are full partners in helping to develop modern transportation systems.

"At FELLFAB® we are proud of our ability to meet new market demands for a constantly evolving modern transportation system. We believe we are partners in developing ever greater cost efficiencies and transportation improvements."

MATERIALS HANDLING

Innovative Textile Products Engineered for Success & Customer Satisfaction

FELLFAB® is a leader in the North American bulk container liner industry with custom bulk shipping and storage systems.

For more than 40 years, companies have looked to us for the answer to their concerns of protecting their products from contaminants while at the same time significantly reducing materials handling costs.

As an ISO 9001:2000 certified organization, we are capable of consistently delivering high quality and meeting rigid performance criteria, on time and on budget.

FELCO® Container Liner Systems

FELCO® Container Liner Systems are ideal for shipping dry, free flowing materials in bulk.

- Noticeably reduce packaging and labour costs
- Dramatically and economically reduce the risk of product contamination
- Ideal for transporting free-flowing granular substances such as chemical flake, powder and resin; food products, such as coffee, cocoa, wheat, beans, legumes, pulses, and other similar grains.
- Bulk Container Liner Systems are compatible with 20' to 53' ISO containers
- Drive efficiency. One operator can pneumatically load or unload 45,000 pounds of free flowing material in as little as 35 minutes
- Available with integrated bulkhead and alternative bulkhead configurations
- Manufactured with a variety of materials including food grade and reusable materials

FELCO® Portable Silo Systems

Companies presently storing free flowing, dry materials in bags, corrugated boxes, or super-sacks can easily convert to bulk storage with substantial savings, using the FELCO® Portable Silo System.

- Substantially reduce the capital outlay required for a bulk storage silo
- Improve production costs through the benefit of lower bulk quantity pricing
- The extremely strong FELCOLENE® woven polyolefin liner is tear and puncture resistant, and can safely accommodate up to 60,000 pounds of free-flowing granular or powdered substances
- An empty silo provides for relocation flexibility as it can be readily moved as necessary
- Easy assembly with no need for costly construction permits or special zoning requirements

FELCO® Bulk Liquid Container Systems

FELCO® Bulk Liquid Container Systems are the most cost-effective way to ship bulk liquids such as oil, wine and potable water free of contamination.

- Sized to fit ISO shipping containers with cargo capacities up to 44,000 pounds
- Can be equipped with valves for gravity discharge
- Custom fabrications available
- Ideal for one-way or re-use distribution

"FELLFAB® is constantly seeking new markets that can benefit from our textile-based expertise.

Our experience has taught us that the knowledge we acquire handling one type of commodity can often be applied to others, whether dry goods or liquid."

FELLFAB®

MILITARY

Innovative Textile Products Engineered for Success & Customer Satisfaction

From basic supplies to the next generation of sophisticated textile applications, FELLFAB® is on the front line as a prime contractor in the military market.

We have been supplying a diverse range of textile products for demanding military and humanitarian uses for more than 40 years.

Full project management

During that time, we have developed the engineering and administrative capabilities to provide full project and program management. This involvement truly lets us enter into long-term partnerships with our clients.

FELLFAB® is a major supplier to the Department of National Defence Canada and is a member of the Canadian Defence Industries Association (CDIA). We also supply the U.S. Department of Defense, the Defense Logistics Agency, the United Nations and the Red Cross.

Our years of experience have enabled us to hold Intellectual Property Licences to Department of National Defence Canada proprietary designs. We have the ability to meet MIL specifications and provide testing and certification accordingly.

In addition, our ISO 9001:2000 certification means we can meet stringent customer requirements and manufacture within tight tolerances, on time and on budget.

Building in high technology

Our products include highly specialized load carriage equipment, camouflage and deception equipment, military logistics vehicle components, tents and tarpaulins, and casualty bags.

On the horizon is the next generation of sophisticated textiles that incorporate advanced electronic and laser technology built into the fabric for uses such as warfare simulations to test battlefield performance of personnel and equipment.

FELLFAB®'s designers and engineers have the skills and the expertise to fully develop these capabilities in partnership with our clients. They have years of experience in product design and prototype development, from project conception to end user field trials, to ensure the form, fit and function of the final product.

FELLFAB®

"From a simple product supply relationship, FELLFAB® has developed the ability to provide full project management in a functional strategic way.

This capability becomes increasingly important in light of the exciting and sophisticated next generation of textiles now under development."

President

INDUSTRIAL

Innovative Textile Products Engineered for Success & Customer Satisfaction

Three words describe FELLFAB®'s strength in industrial markets: longevity, experience and diversity.

More than 50 years experience in custom manufacturing textile-based solutions has taught us how to meet or exceed customer requirements for a wide range of industrial applications.

Products for tomorrow

The uses that can be found for today's modern fabrics and textiles are boundless.

Our products range from lightweight, heavy-duty mailbags that are ergonomically designed to fit the human body to highly sophisticated insulation panels for nuclear reactors.

We manufacture customized robot covers, an increasingly important application in today's automated world where we need to ensure that robotic equipment can run 24 hours a day in all conditions.

Other FELLFAB® industrial products include many types of protective covers for machinery and heavy equipment, custom designed shipping covers for transformers, locomotives and aircraft wings, insulation panels and curtains for many in-plant applications, elevator cab pads and various types of mail and newspaper carrier bags.

Finding customized solutions

But the uses for our products are far more varied. Our designers, engineers and sales executives are experts who can work with you – at your location - to design and develop customized, cost-effective high performance products that meet your specific needs.

We can provide total project management from conception to completion. It's all part of our commitment to enter long-term relationships with our customers.

We are capable of undertaking low-volume runs of unique and complex items as well as providing first articles and prototypes. Our ISO 9001:2000 certification demonstrates our ability to deliver high quality and meet rigid performance criteria, on time and on budget.

FELLFAB®

"Industrial products are our flagship line. They are the foundation of our success that have enabled us to supply unique products to virtually all market segments.

We have learned to listen, hear and respond to our customers as we work with them to develop customized solutions for traditional and non-traditional applications."

AEROSPACE

Innovative Textile Products Engineered for Success & Customer Satisfaction

FELLFAB®'s achievements can be seen in outer space as well as around the world. Our skills, our knowledge and our people have made us a leading manufacturer of highly specialized textile products for the aerospace industry.

We have been a supplier and a sub-contractor to major aerospace organizations and agencies for more than 25 years. Among our accomplishments, we are a proud supplier to the CANADARM 1 & 2 projects for the Space Shuttle Program and International Space Station.

FELLFAB® people - skilled and dedicated

We specialize in developing prototypes that meet precise customer specifications – and much of our success is because of our people.

Our highly skilled development and engineering team provides the highest level of product performance and technical expertise from the front-end custom design stage through to the manufacturing and testing processes.

Our ISO 9001:2000 certification demonstrates our capability to meet the most rigorous performance criteria consistently and cost effectively.

In addition, our manufacturing capabilities are enhanced by state-of-the-art CAD/CAM technology and a contamination-free Class 100,000 Clean Room for the sensitive applications required by such a demanding industry. In-house test capabilities ensure we meet every customer specification.

A galaxy of applications

Applications for FELLFAB®'s abilities range from satellite communications to robotics. We manufacture high technology components such as thermal insulation blankets under the most stringent conditions using multi-layer, metalized films and materials.

We also employ strict project management, reporting and tracking procedures for high-level programs to ensure the highest level of product integrity and attention to detail.

"Setting up a contamination-free Clean Room was a huge challenge when we first began serving the aerospace industry. It also fundamentally changed the way we do business.

We are now a sophisticated manufacturer with the expertise, capabilities and flexibility to successfully serve an exciting and demanding market."
