

# FELCOMED<sup>®</sup>

## IV PRESSURE INFUSION SYSTEM

### PRODUCT FEATURES

A patented pressure infusion jacket which maintains the temperature of the IV solution.

Employs a weatherproof nylon outer cover to protect the thermal material properties in extreme climactic conditions.

Accepts both 1000ml or 500ml IV solution bags without using adaptors, and has quick change capabilities.

Allows for quick monitoring of solution volume through a clear observation window and includes a clear plastic patient medication ID pocket.

Available in International Bright Orange or Khaki.

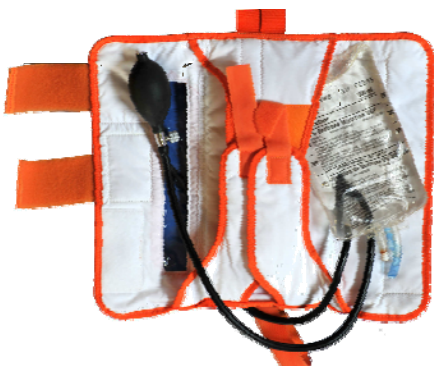

### APPLICATIONS

Search & Rescue - Air Evacuation (non metal jacket construction) - Anaesthesia/O.R./P.A.R. applications in any hospital - EMT - Field Hospitals & Battlefield locations  
First Responders
