

## **FELLFAB® Partners with ClearCabin, LLC to Bring the Premier Anti-Microbial Barrier Solution to Mass Transit.**

April 30, 2020 | [News](#)

FELLFAB® announced today its exclusive North American distribution agreement with ClearCabin, LLC to bring FELLFAB® ClearCar, the premier anti-microbial barrier solution, to the commercial aviation, passenger rail, motor coach and bus markets. FELLFAB® ClearCar is a wipe on barrier solution for viral, bacterial, algae, and fungal challenges lasting up to 90 days. FELLFAB® ClearCar is today's preferred solution for railcar cabins, aircraft cabins, bus interiors, taxis, and ridesharing vehicles. FELLFAB® ClearCar is equally effective in the mobile shelter market, keeping the interior of emergency tents and shelters ready for today's challenges.

Extensive aircraft and rail car interior cleaning is fast becoming a requirement in our markets," said Nick Efthimiadis, President of the FELLFAB® group of operating companies. "With the ClearCabin agreement, FELLFAB® raises the bar in providing total interiors solutions to its longstanding airline and transit authority customers."

"ClearCabin, LLC has an amazing system. FELLFAB® has an amazing reach within the commercial aviation, rail, coach, and bus markets. Together, we bring a comprehensive approach to widely regarded concerns that have arisen in these unprecedented times, namely COVID-19." said Sean Dorgan, President of ClearCabin, LLC

Powered by Prevent-X, FELLFAB® ClearCar is an antimicrobial barrier treatment originally marketed for the commercial transportation industry. Surfaces coated with this barrier are protected from microbes, including the Covid-19 virus (surrogate). An invisible bio-barrier coating is applied to surfaces. The barrier acts as sharp blades to microbes. When microbes come in contact with the treated surface, they are punctured and destroyed.

- Up to 90 Day Antimicrobial Coating
- Safely Halts the Spread of Germs
- Effective on Hard & Soft Surfaces
- Dries Within Minutes
- Bonds to all Surfaces
- Registered with the EPA as a Bacteriostatic Agent
- Safe for Food Prep & Serving Surfaces
- Odorless & Colorless
- Creates a Safe Environment for Employees and Customers
- Invisibly Protects Surfaces from Deterioration
- Makes Future Cleanings Easier
